Brownfields 2013 Cleanup Grant Fact Sheet
Meriden, CT

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

$200,000 for hazardous substances

EPA has selected the City of Meriden for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up a parcel located at 50 East Main Street. The parcel was once part of the HUB site, which was first developed in the mid-1800s as a manufacturing facility. The site was later used for glass cutting, silver manufacturing, wooden door manufacturing, and a variety of shops. By 2007, all businesses at the site were no longer in operation, and all buildings had been demolished. The parcel is contaminated with semi-volatile and volatile organic compounds, and heavy metals. Grant funds also will be used to support community outreach activities.
