

Brownfields 2009 Job Training Grant Fact Sheet

Los Angeles Conservation Corps, CA

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. On February 17, 2009, President Barack Obama signed into law the American Recovery and Reinvestment Act. The Recovery Act is an unprecedented effort to jumpstart our economy, and create or save millions of jobs. This law provided stimulus funds to the Brownfields Program to award grants to train unemployed or underemployed individuals to evaluate and clean up former industrial and commercial sites. Under this law, EPA will provide financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants.

Community Description

The Los Angeles Conservation Corps was selected to receive a job training grant. Based in Los Angeles (population 4,018,080), the Corps will target residents in the city's federally designated Empowerment Zone, with a focus on the Wilmington and Pacoima communities. In Wilmington, 25 percent of families live at or below the poverty level, and 90.7 percent of residents are minorities. In Pacoima, 17 percent of families live at or below the poverty level, and 89.2 percent of residents are minorities. Pacoima is home to four Superfund sites and several brownfields. The state reports that jobs in the construction trades will increase by eight percent in Los Angeles County between 2004 and 2014, and the Mayor of Los Angeles supports programs that promote a greener and more sustainable city. The Corps expects these trends and the city's first-source hiring agreements will increase the demand for skilled workers trained in green practices and environmental technologies.

Job Training Grant

\$500,000

EPA has selected the Los Angeles Conservation Corps for a job training grant. The Corps plans to train 100 participants, place 80 graduates in environmental jobs, and track graduates for one year after job placement. The training program will consist of four 10-week cycles of 400 hours per cycle. Courses will include HAZWOPER, asbestos and lead abatement, weatherization, and energy audit certifications. Each area of training will provide participants with certifications needed to take advantage of jobs created by the assessment and cleanup of brownfields. To place graduates in jobs, the Corps will work with its 26-member Vocational Services Advisory Board, which includes employers, trade unions, and training firms. It also will work with WorkSource Centers in Los Angeles County to match graduates with employers in the environmental remediation field.
