

## **Brownfields 2012 Cleanup Grant Fact Sheet** **Standing Rock Sioux Tribe, SD**

### **EPA Brownfields Program**

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### **Cleanup Grant**

*\$200,000 for hazardous substances*

EPA has selected the Standing Rock Sioux Tribe for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the Smee School Teacher's Quarters at 101 Main Street, within the Wakpala Community on the Standing Rock Sioux Reservation in South Dakota. The site is contaminated with metals and inorganic materials. Grant funds also will be used for community involvement activities.
