

Brownfields 2013 Assessment Grant Fact Sheet

Crawford County, OH

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grant

\$200,000 for hazardous substances

EPA has selected Crawford County for a brownfields assessment grant. Community-wide hazardous substances grant funds will be used to conduct four Phase I and three Phase II environmental site assessments. Grant funds also will be used to compile an inventory of sites, conduct cleanup planning, and support community outreach activities. The focus of this project will be the communities of Bucyrus, Galion, and Crestline.
