

Brownfields 2013 Cleanup Grant Fact Sheet

Maurice River Township, NJ

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected Maurice River Township for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the Sapello Foundry site located at 65 Broadway Street. Originally developed as an iron pump manufacturing foundry, the site has been vacant since 1993 and is contaminated with metals, polynuclear aromatic hydrocarbons, PCBs, and hexavalent chromium. Grant funds also will be used to support community outreach activities.
