

Brownfields 2013 Cleanup Grant Fact Sheet

Silver City, NM

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the Town of Silver City for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the Silver City Waterworks site at 1721 Little Walnut Road. The property was built in 1887 as the town

's first water supply. It also has been used as a maintenance shop and storage area, but is currently vacant. The site is contaminated with heavy metals and inorganic contaminants.
