

Brownfields 2013 Cleanup Grant Fact Sheet **Westmass Area Development Corporation, Ludlow, MA**

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grants

\$400,000 for hazardous substances

EPA has selected the Westmass Area Development Corporation for two brownfields cleanup grants. Hazardous substances grant funds will be used to clean up Storehouse Buildings #292-296 and #286-291 in the Ludlow Mills Complex located at 100 State Street. The complex has been used for various manufacturing operations over the last 100 years, such as gun barrel, textile and jute manufacturing. It is currently used by various small light industries and as storage space. It is contaminated with inorganic substances. Grant funds also will be used to support community outreach activities.
