

UNIVERSITY FOR SENIORS
University of Minnesota-Duluth Continuing Education
Winter Term

Research at EPA in Duluth: A historical perspective

(January 14 – February 4, 2010)*

Week 3.

Presentation #1 (Thursday January 28 at 11:AM)

Can mineral fibers cause asbestos related diseases? The long path from the Reserve Mining case to today

Phil Cook

Asbestos related diseases occur long after exposure and are related to a much broader range of elongated durable particles than expected. Find out why achieving and using a much needed health risk prediction and prevention model for mineral fibers in NE Minnesota has yet to be accomplished.
