Benthic macroinvertebrate surveys in Chequamegon Bay in support of invasive species early detection research.

Chequamegon Bay Research Symposium, Ashland WI, April 14,2015.

This presentation describes the impetus and approach for MED invasive species early detection research generally and presents preliminary results concerning benthic composition and non-native species found in the 2013 Chequamegon Bay survey. The audience is a group of researchers and managers interested in science-related activities in Lake Superior's Chequamegon Bay.
