EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. The Small Business Liability Relief and Brownfields Revitalization Act of 2002, as amended by the Brownfields Utilization, Investment and Local Development Act of 2018, was passed to help states and communities around the country clean up and revitalize brownfield sites. Under this law, EPA provides financial assistance to eligible applicants through five competitive grant programs: Multipurpose Grants, Assessment Grants, Revolving Loan Fund Grants, Cleanup Grants, and Environmental Workforce Development and Job Training Grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

EPA has selected the City of Brooksville for a Brownfields Assessment Grant. Community-wide hazardous substances and petroleum grant funds will be used to conduct 16 Phase I and five Phase II environmental site assessments. Grant funds also will be used to prepare five cleanup plans, develop a community involvement plan, and conduct community involvement activities. The grant will focus on the 21 sites identified along the Broad Street Corridor target area, including the sites at 615 Old Hospital Drive and 611 North Broad Street.
