

Brownfields 2013 Area-Wide Planning Grant Fact Sheet *Environmental Health Coalition, National City, CA*

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through competitive grant programs for brownfields site assessment, site cleanup, revolving loan funds, area-wide planning, and job training. Additional funding support is provided to state and tribal response programs through a separate mechanism.

Brownfields Area-Wide Planning Program

EPA's Brownfields Area-Wide Planning Program assists communities in responding to local brownfields challenges, particularly where multiple brownfield sites are in close proximity, connected by infrastructure, and limit the economic, environmental and social prosperity of their surroundings. This program enhances EPA's core brownfields assistance programs by providing grant funding to communities so they can perform the research needed to develop an area-wide plan and implementation strategies for brownfields assessment, cleanup, and reuse. The resulting area-wide plans provide direction for future brownfields area improvements that are protective of public health and the environment, economically viable, and reflective of the community's vision for the area. Recipients selected under this program will receive up to \$200,000 in EPA grant funding.

Project Description

\$200,000

EPA has selected the Environmental Health Coalition as a Brownfields Area-Wide Planning grant recipient. Environmental Health Coalition will work with the community and other stakeholders to develop a community-driven area-wide plan and implementation strategy to create a green industrial park in a brownfield area. The industrial park will accommodate auto body and auto painting shops currently operating in the residential Westside section of National City. The goal of the process is to plan for the cleanup and redevelopment of a brownfield site as a state-of-the-art green industrial park comprised of relocated businesses, and the transformation of the currently polluted Westside neighborhood into a healthy, thriving residential/commercial area. Key partners for this project include the City of National City, National City Chamber of Commerce, San Diego Organizing Project, Kimball Elementary School, and Paradise Creek Educational Park, Inc.
