

Brownfields 2013 Area-Wide Planning Grant Fact Sheet

Groundwork Hudson Valley, Yonkers, NY

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country clean up and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through competitive grant programs for brownfields site assessment, site cleanup, revolving loan funds, area-wide planning, and job training. Additional funding support is provided to state and tribal response programs through a separate mechanism.

Brownfields Area-Wide Planning Program

EPA's Brownfields Area-Wide Planning Program assists communities in responding to local brownfields challenges, particularly where multiple brownfield sites are in close proximity, connected by infrastructure, and limit the economic, environmental and social prosperity of their surroundings. This program enhances EPA's core brownfields assistance programs by providing grant funding to communities so they can perform the research needed to develop an area-wide plan and implementation strategies for brownfields assessment, cleanup, and reuse. The resulting area-wide plans provide direction for future brownfields area improvements that are protective of public health and the environment, economically viable, and reflective of the community's vision for the area. Recipients selected under this program will receive up to \$200,000 in EPA grant funding.

Project Description

\$186,529

EPA has selected Groundwork Hudson Valley as a Brownfields Area-Wide Planning grant recipient. Groundwork Hudson Valley will work with the community and other stakeholders to develop an area-wide plan and implementation strategy for brownfields within the Lawrence Street neighborhood in Yonkers. Groundwork will work with the community to examine whether vacant brownfield properties may be used for phase one of a multi-use path. The path will provide a direct link to the subway and access to jobs in New York City. Groundwork also will train grassroots constituencies in the language and process of brownfields redevelopment under this grant. Key project partners include the City of Yonkers, Westchester County, The New York City Department of Transportation, the National Park Service, and various other local business and community groups.
