

Brownfields 2013 Cleanup Grant Fact Sheet **Augusta Canal Authority, GA**

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the Augusta Canal Authority for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the former Sibley Mill at 1717 Goodrich Street in the City of Augusta. Originally constructed in 1881, the mill operated as a textile mill until it closed in 2006. Prior to that, the site was used by Confederate States of America's Powder Works for the manufacture of gunpowder, ammunition, and other war materials. Hydroelectric power is still generated from the turbines at the site. The site is contaminated with heavy metals and semi-volatile organic compounds. Grant funds also will be used to conduct community outreach activities.
