

Brownfields 2013 Assessment Grant Fact Sheet **Green Bay, WI**

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grants

\$200,000 for hazardous substances

\$200,000 for petroleum

EPA has selected the City of Green Bay for two brownfields assessment grants. Community-wide hazardous substances and petroleum grant funds will be used to conduct 16 Phase I and eight Phase II environmental site assessments, and develop four cleanup plans. Grants funds also will be used to integrate the city's brownfields inventory with its geographic information system (GIS) and conduct community involvement and outreach activities. The focus of this project will be on sites in three key areas: the downtown area along the Fox and East Rivers, Velp Avenue Corridor, and Webster Avenue Corridor.
