

Brownfields 2013 Cleanup Grant Fact Sheet

Howardville, MO

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the City of Howardville for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the Howardville School at 6916 U.S. Highway 61. The Howardville School operated on the site from 1958 until 1991, and the city utilized the building from 1994 until 2003. The site is contaminated with inorganic contaminants and metals. Grant funds also will be used to conduct community involvement activities.
