

Brownfields 2013 Cleanup Grant Fact Sheet **Ithaca, NY**

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the City of Ithaca for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the Ithaca Falls Overlook site located at 125 Lake Street. The 0.95-acre site is part of a former industrial property where firearms and munitions were manufactured from 1885 to 1986. The site is contaminated with metals. Grant funds also will be used to support community outreach activities.
