

## **Brownfields 2013 Cleanup Grant Fact Sheet Newark, NJ**

### **EPA Brownfields Program**

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### **Cleanup Grants**

*\$600,000 for hazardous substances*

EPA has selected the City of Newark for three brownfields cleanup grants. Hazardous substances grant funds will be used to clean up Lot 15 and Lot 53 of the former Orbis Site located at 55 Virginia Street, and Lots 41 and 43 of the former Orbis Products Corporation Facility located at 47-63 McClellan Street. The site is an inactive chemical manufacturing facility that has been abandoned since at least 1996. The soil and groundwater are contaminated with volatile and semi-volatile contaminants and hazardous waste. Grant funds also will be used to support community outreach activities.
