

Brownfields 2013 Cleanup Grant Fact Sheet Orlando, FL

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the City of Orlando for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the western portion of the former Centroplex site located at the northeast corner of West Livingston Street and North Parramore Avenue. Historically, the site has been used as an armory, dry cleaner, and federal research and testing facility. Contaminants of concern include arsenic, polycyclic aromatic hydrocarbons, and the pesticide dieldrin. Grant funds also will be used to support community outreach activities.
