

Brownfields 2013 Cleanup Grant Fact Sheet **St. Marks, FL**

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the City of St. Marks for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the former St. Marks Refinery at 627 Port Leon Drive. Built in 1954, the refinery was used to process crude oil for jet fuel and asphalt, and manufacture specialty chemicals until it closed in 2001. A 2012 assessment revealed that the primary contaminants of concern include dioxins, metals, and volatile organic compounds. Grant funds also will be used to analyze and approve the cleanup action plan and support community outreach activities.
