

## **Brownfields 2013 Cleanup Grant Fact Sheet** **Trenton, NJ**

### **EPA Brownfields Program**

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### **Cleanup Grant**

*\$200,000 for hazardous substances*

EPA has selected the City of Trenton for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the Scarpati Site located at 10 Nottingham Way. Commercial development of the property began in the late 1920s. The site has been used as an automobile repair shop, gasoline station, and storage facility for scrap metal recycling, and for automobile storage and used automobile and truck sales. The site is contaminated with PCBs, metals, and polycyclic aromatic hydrocarbons.
