

## **Brownfields 2013 Assessment Grant Fact Sheet** *Kansas Department of Health and Environment*

### **EPA Brownfields Program**

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### **Assessment Grant**

*\$300,000 for hazardous substances*

*\$300,000 for petroleum*

EPA has selected the Kansas Department of Health and Environment for a brownfields assessment coalition grant. Community-wide hazardous substances and petroleum grant funds will be used to conduct 57 Phase I and 26 Phase II environmental site assessments. Grant funds also will be used for community involvement activities and cleanup planning. Activities will target rural-based communities throughout Kansas. Coalition partners are the City of Chanute, Fort Scott/Bourbon County Riverfront Authority, and the City of Ottawa.
