

Brownfields 2013 Assessment Grant Fact Sheet King County, WA

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grants

\$200,000 for hazardous substances

\$200,000 for petroleum

EPA has selected King County for two brownfields assessment grants. Hazardous substances and petroleum grant funds will be used to conduct five Phase I and five Phase II environmental site assessments, primarily at sites in the King County Duwamish Manufacturing/Industrial Center and surrounding residential neighborhoods. Grant funds also will be used to provide technical assistance on brownfields assessment and cleanup planning to five to 10 new community partners each year, and to conduct community involvement activities.
