

## **Brownfields 2013 Cleanup Grant Fact Sheet** **Fort Edward, NY**

### **EPA Brownfields Program**

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### **Cleanup Grant**

*\$200,000 for hazardous substances*

EPA has selected the Town of Fort Edward for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the former Grand Union site at 354 Broadway. The site, a former grocery store, was also once used as a gravel pit and capacitor recycling facility. Soils at the site are contaminated with PCBs. Grant funds also will be used to conduct community involvement activities. The site is part of the town's priority cleanup area, the 85-acre Route 4 Uptown Corridor.
