

Brownfields 2013 Job Training Grant Fact Sheet Oxnard, CA

EPA Environmental Workforce Development and Job Training Grant Program

In 2010, the Office of Brownfields and Land Revitalization (OBLR) led an effort to more closely collaborate with other programs within EPA on workforce development and job training. Program offices now participating in the expanded initiative include the Office of Resource Conservation and Recovery (ORCR), Office of Superfund Remediation and Technology Innovation (OSRTI), Office of Underground Storage Tanks (OUST), Federal Facilities Restoration and Reuse Office (FFRRO), Center for Program Analysis (CPA), Innovation, Partnerships, and Communication Office (IPCO), Office of Wastewater Management (OWM), Office of Chemical Safety and Pollution Prevention (OCSPP), and the Office of Emergency Management (OEM). This initiative was created to develop a job training cooperative agreement opportunity that includes expanded training in other environmental media outside the traditional scope of brownfields hazardous waste remediation. As a result of this effort, the Environmental Workforce Development and Job Training Grants Program now allows applicants to deliver other training in the environmental field, in addition to the core traditional brownfields hazardous waste and petroleum training historically provided.

Environmental Workforce Development and Job Training grant funds are provided to nonprofit organizations and other eligible entities to recruit, train, and place predominantly low-income and minority, unemployed and underemployed residents from solid and hazardous waste-impacted communities. Residents learn the skills needed to secure full-time, sustainable employment in the environmental field, including a focus on assessment and cleanup activities. Since 1998, EPA has funded 206 job training grants totaling over \$45 million through the Environmental Workforce Development and Job Training Grants Program. As of March 2013, approximately 11,473 individuals have completed training, of which approximately 8,198 have obtained employment in the environmental field with an average starting hourly wage of \$14.12. This equates to a cumulative placement rate of approximately 71% since the program was created.

Job Training Grant

\$200,000

EPA has selected the City of Oxnard for an Environmental Workforce Development and Job Training grant. The City of Oxnard plans to train 55 students, place 45 graduates in environmental jobs, and track graduates for one year. The core training program includes 62 hours of instruction in 40-hour HAZWOPER, general industry safety and health, and confined entry. Half of the participants will complete an additional 16 hours of hazardous materials handling procedures training and half will complete an additional 60 hours of wastewater treatment coursework. In addition, up to ten interested participants with high achievement records will be offered the Class B commercial driver's license course and ten will be offered a 200-hour wastewater treatment internship. A total of nine state and federal certifications will be offered. The City of Oxnard is targeting unemployed and underemployed migrant and Native American workers, veterans, ex-offenders, high school dropouts, homeless individuals, and other disadvantaged residents Oxnard. Key partners include Ventura Community College, Rural Community Assistance Corporation, Center for Creative Land Recycling, Center for Employment and Training, and the Saviers Road Design Team, a local community-based organization involved with the Halaco Superfund site.
