

Brownfields 2013 Job Training Grant Fact Sheet **Merrimack Valley Workforce Investment Board, Lawrence, MA**

EPA Environmental Workforce Development and Job Training Grant Program

In 2010, the Office of Brownfields and Land Revitalization (OBLR) led an effort to more closely collaborate with other programs within EPA on workforce development and job training. Program offices now participating in the expanded initiative include the Office of Resource Conservation and Recovery (ORCR), Office of Superfund Remediation and Technology Innovation (OSRTI), Office of Underground Storage Tanks (OUST), Federal Facilities Restoration and Reuse Office (FFRRO), Center for Program Analysis (CPA), Innovation, Partnerships, and Communication Office (IPCO), Office of Wastewater Management (OWM), Office of Chemical Safety and Pollution Prevention (OCSPP), and the Office of Emergency Management (OEM). This initiative was created to develop a job training cooperative agreement opportunity that includes expanded training in other environmental media outside the traditional scope of brownfields hazardous waste remediation. As a result of this effort, the Environmental Workforce Development and Job Training Grants Program now allows applicants to deliver other training in the environmental field, in addition to the core traditional brownfields hazardous waste and petroleum training historically provided.

Environmental Workforce Development and Job Training grant funds are provided to nonprofit organizations and other eligible entities to recruit, train, and place predominantly low-income and minority, unemployed and underemployed residents from solid and hazardous waste-impacted communities. Residents learn the skills needed to secure full-time, sustainable employment in the environmental field, including a focus on assessment and cleanup activities. Since 1998, EPA has funded 206 job training grants totaling over \$45 million through the Environmental Workforce Development and Job Training Grants Program. As of March 2013, approximately 11,473 individuals have completed training, of which approximately 8,198 have obtained employment in the environmental field with an average starting hourly wage of \$14.12. This equates to a cumulative placement rate of approximately 71% since the program was created.

Job Training Grant

\$200,000

EPA selected the Merrimack Valley Workforce Investment Board (MVWIB) for an Environmental Workforce Development and Job Training grant. MVWIB plans to train 45 students, place 31 graduates in environmental jobs, and track graduates for one year. The core training program includes 174 hours of instruction, including coursework in 40-hour HAZWOPER; introduction to careers in recycling and leaking underground storage tank corrective action (e.g., site assessment and remediation) awareness, including procedures for tank removal when necessary to perform corrective action; construction site stormwater management; recycling, reuse, remanufacturing industry; confined space entry; Occupational Safety and Health Administration 10-hour construction safety; fall protection; and lead and asbestos abatement. A total of six state and federal certifications will be offered. For this job training program, MVWIB is targeting unemployed and underemployed minority residents of the City of Lawrence. Key partners include GroundWork Lawrence, the City of Lawrence's Community Development Department, and the Merrimack Valley Planning Commission.
