

Brownfields 2014 Assessment Grant Fact Sheet

Pulaski, VA

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grant

\$200,000 for hazardous substances

EPA has selected the Town of Pulaski for a brownfields assessment grant. Community-wide hazardous substances grant funds will be used to conduct six Phase I and three Phase II environmental site assessments, following prioritization of sites in the existing inventory. Grant funds also will be used for cleanup planning and community engagement activities.
