

Brownfields 2014 Assessment Grant Fact Sheet **Wayne County Economic Development Authority, WV**

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grant

\$200,000 for hazardous substances

EPA has selected the Wayne County Economic Development Authority for a brownfields assessment grant. Community-wide hazardous substances grant funds will be used to expand and inventory of brownfields, conduct up to 15 Phase I and four Phase II environmental site assessments, and evaluate sites for cleanup opportunities. The Development Authority also will host workshops and availability sessions, and develop communications materials as part of outreach to the community.
