

## **Brownfields 2016 Job Training Grant Fact Sheet** **Los Angeles Conservation Corps, CA**

### **EPA Brownfields Program**

In 2010, the EPA's Office of Brownfields and Land Revitalization (OBLR) led an effort to more closely collaborate with other programs within the Agency on workforce development and job training. Program offices now participating in the expanded initiative include the Office of Resource Conservation and Recovery (ORCR), Office of Superfund Remediation and Technology Innovation (OSRTI), Office of Communications, Partnerships, and Analysis (OCPA), Office of Wastewater Management (OWM), Office of Chemical Safety and Pollution Prevention (OCSPP), and the Office of Emergency Management (OEM). This initiative was created to develop a job training cooperative agreement opportunity that includes expanded training in other environmental media outside the traditional scope of brownfields hazardous waste assessment and cleanup. As a result of this effort, the Environmental Workforce Development and Job Training program now allows applicants to deliver a broader array of training in the environmental field, in addition to, the traditional brownfields hazardous waste and petroleum training historically provided. Through the expanded Environmental Workforce Development and Job Training program, graduates develop wider skill sets that improve their ability to secure full-time, sustainable employment in various aspects of hazardous and solid waste management and within the larger environmental field, including water quality improvement and chemical safety. This effort also gives communities more flexibility to provide different types of environmental training based on local employers' hiring needs.

Environmental Workforce Development and Job Training grant funds are provided to nonprofit organizations and other eligible entities to recruit, train, and place residents from solid and hazardous waste-impacted communities, including low-income and minority, unemployed, and underemployed individuals. To date, EPA has funded 256 job training grants totaling over \$54 million through the Environmental Workforce Development and Job Training program. As of January 2016, more than 14,600 individuals have completed training, and of those, more than 10,500 have obtained employment in the environmental field, with an average starting hourly wage of \$14.32. This equates to a cumulative placement rate of approximately 72% since the program was created in 1998.

### **Job Training Grant**

*\$200,000.00*

EPA has selected the Los Angeles Conservation Corps for an Environmental Workforce Development and Job Training grant. The Los Angeles Conservation Corps plans to train 54 students and place at least 48 graduates in environmental jobs. The core training program includes 258 hours of instruction in 40-hour HAZWOPER, construction health and safety, asbestos and lead worker training, photovoltaic mechanics and installation, CPR/First Aid/AED, confined space entry, and mold awareness. Participants who complete the training will earn two state certifications and three federal certifications. The Los Angeles Conservation Corps is targeting unemployed and underemployed residents of Los Angeles, California. Key partners include Creation World Safety, LA Trade Tech College, National Association of Training and Environmental Consulting, Healthy Homes Collaborative, Los Angeles Housing Department, Canoga Park-South Valley WorkSource Center, Electrical Training Institute, and Vinewood Residential Re-entry Center.
