

Brownfields 2016 Cleanup Grant Fact Sheet Chattanooga, TN

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the City of Chattanooga for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the former Glover Tract located on the 500 block of East 38th Street. The site has been a wooded floodplain of South Chattanooga Creek since 1893. Dumping of coal tar residue into the creek and historic overflow have resulted in the site being contaminated with polycyclic aromatic hydrocarbons. Grant funds also will be used to develop a health and safety plan and a community involvement plan.
