

## **Brownfields 2016 Cleanup Grant Fact Sheet** **Shelton, CT**

### **EPA Brownfields Program**

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### **Cleanup Grant**

*\$200,000 for hazardous substances*

EPA has selected the City of Shelton for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the former Chromium Process Facility on 113 Canal Street West. The site hosts a large manufacturing building that was used at one time for a major metal plating and finishing facility. The site's soil and groundwater are contaminated with chlorinated volatile organic compounds, polynuclear aromatic hydrocarbons, and heavy metals. Grant funds also will be used for community involvement activities.
