

Brownfields 2016 Cleanup Grant Fact Sheet

Hardesty Renaissance Economic Development Corporation, Kansas City, MO

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the Hardesty Renaissance Economic Development Corporation for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up Building 10 of the Hardesty Federal Complex on 605 Hardesty Avenue in Kansas City. The building was used as a United States Army Quartermaster Corps storage depot in the late 1940s and provided a variety of support functions for various federal agencies until it was closed in 2002. It has been vacant since then and is contaminated with metals and inorganic substances. Grant funds also will be used to support community outreach activities.
