

Brownfields 2016 Cleanup Grant Fact Sheet

Marble Block Redevelopment Corporation, Biddeford, ME

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the Marble Block Redevelopment Corporation for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the Marble Block site at 129 Main Street in Biddeford. The site has been used for various commercial uses since the late 1800s, including as a clothing store and pharmacy, and a department store. It has been vacant since 2008 and is contaminated with PCBs, metals, and inorganic contaminants. Grant funds also will be used to support community involvement activities.
