

## **Brownfields 2016 Cleanup Grant Fact Sheet** **Wilton, ME**

### **EPA Brownfields Program**

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

### **Cleanup Grant**

*\$200,000 for hazardous substances*

EPA has selected the Town of Wilton for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the former Forster Manufacturing Mill, Parcel 1, at 516 Depot Street. Constructed in 1902, the site has operated as a woolen mill; croquet set, clothespin, and toothpick manufacturing facility; and printing press and packaging facility. The mill has been vacant since 2004 and is contaminated with semi-volatile organic compounds, PCBs, and metals. Grant funds also will be used to conduct health monitoring and support community outreach activities.
