

WMOST v3.1 components

WMOSTv3.1_062220.xlsm – Latest version of WMOST (32-bit) that works with HCAM.

WMOSTv3.1_070121.xlsm - Latest version of WMOST v3.1 (64-bit) that works with HCAM

Addendum_UserGuide_Reservoir_clean.docx – Addendum 1 to WMOST v3 User Guide. This addresses some updates to WMOST v3.01 and 3.1 required for cases in which the user does not wish to include a reservoir at the base of the watershed.

Addendum_UserGuide_06_2020_greenroofs.docx – Addendum 2 to WMOST v3 User Guide. This addresses updates to WMOST v3.01 and 3.1 associated with the addition of green roofs as a BMP. Green roofs were added in part to facilitate calculation of green infrastructure benefits in the new Benefits Module (in review, to be released shortly).

HCAM components

HCAM.zip – Installation package. See user guide for instructions. The installation package installs not only HCAM but also Iron Python and .NET framework.

HCAM Processing.zip – Zipped folder containing files for running HCAM including BMP configuration file (BMP-Config.csv), Build-up/Wash-off coefficients (HRU-Config.csv), and optional HRU-Reference.csv which facilitates update of Buildup/Washoff coefficients.

WMOST_HCAM_UserInstructions_Final.docx – User guide for HCAM

HCAMProcessingExampleFiles.zip – Example file set for learning how to use HCAM.

Time Series.zip – Zipped folder containing example time series files for running HCAM.
