# Overview

- Intro to ToxCast Program
- The Need for the iCSS Dashboard
- Importance of Stakeholder Feedback
- Planning, Production, Dissemination
- Impact on ToxCast Data Usage
- Future Directions

# Introduction of ToxCast Program

Problem: Many chemicals and little data

ToxCast part of Tox21 US Government collaboration

- High-throughput chemical screening for prioritization
- ~1800 chemicals and ~700 assay endpoints

Early recognition of need for stakeholder feedback

Necessary to educate diverse stakeholder community for use of data usage and analysis

iCSS Dashboard

- Interactive tool to explore ToxCast data

## Comparison of Chemical-Endpoint Coverage

# Introduction of ToxCast Program

Problem: Many chemicals and little data

ToxCast part of Tox21 US Government collaboration

- High-throughput chemical screening for prioritization
- ~1800 chemicals and ~700 assay endpoints

Early recognition of need for stakeholder feedback

Necessary to educate diverse stakeholder community for use of data usage and analysis

iCSS Dashboard

- Interactive tool to explore ToxCast data

# Stakeholder Feedback Integrated into Approach

## Stakeholder Events

## Feedback Collected

# Timeline of Stakeholder Events

## Events and # of Participants

### Workshops:

- January 85
- April 277

### Data Summit:

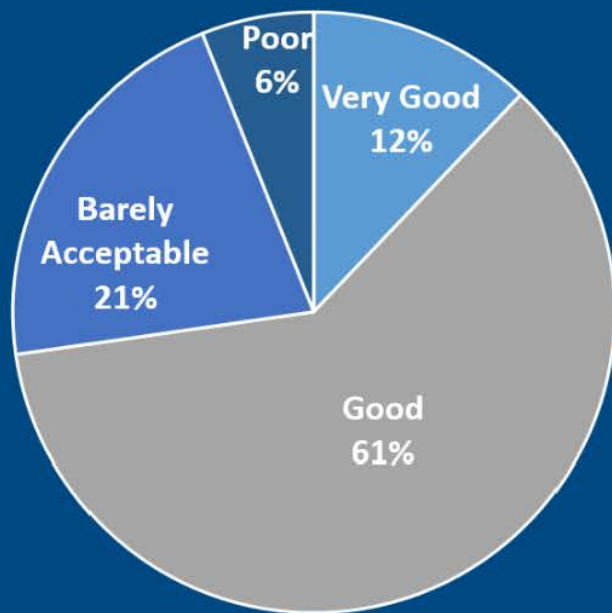

- September 304

## Diverse Participant Group

Academia  
Consultant/Contractor  
EPA Program Office  
EPA Researchers  
Other US Government  
Industry  
International Government  
Media  
Non-Governmental Organizations  
State Environmental Agencies

# Results from Data Summit Survey

**Rating of Usability of the iCSS Dashboard**

**Rating of Quality of the data for subsequent analysis:**

# Lights, Camera, Action!

## Planning

### Planning

- Gather Stakeholder feedback from Workshop and Data Summit Surveys
- Draft Plan for Tutorial Series
- Draft Script for Video 1: iCSS Dashboard Tutorial

## Production

### Production

- Record draft of video
- Receive and incorporate feedback from users
- Produce final version

## Dissemination

### Dissemination

- Post to EPA YouTube and add link to iCSS Dashboard
- Announce and promote video
  - Communities of Practice webinars
  - Other communications efforts
- Briefings to smaller scientific groups (e.g. ACC)
- EPA websites (e.g. CompTox webpage, Data Download Page)
- National/International scientific meetings (e.g. SOT, SETAC)

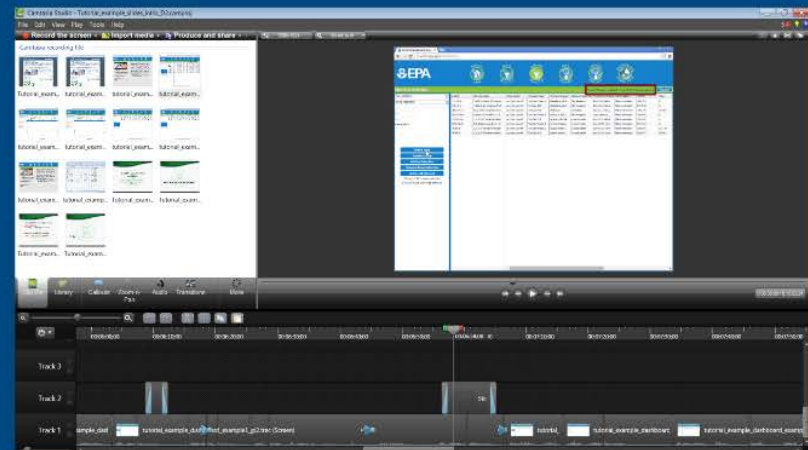

# *Planning*

- Gather Stakeholder feedback from Workshop and Data Summit Surveys
- Draft Plan for Tutorial Series
- Draft Script for Video 1: iCSS Dashboard Tutorial

# Production

- Record draft of video
- Receive and incorporate feedback from users
- Produce final version

Production Task	Production Tools
Screencasting and Editing Software	Camtasia Version 8
Graphics	Adobe Illustrator, Photoshop
Audio Recording and Narration	Rode Microphone

# Dissemination

- Post to EPA YouTube and add link to iCSS Dashboard
- Announce and promote video
  - Communities of Practice webinars
  - Other communications efforts
    - Briefings to smaller scientific groups (e.g. ACC)
    - EPA websites (e.g. CompTox webpage, Data Download Page)
    - National/International scientific meetings (e.g. SOT, SETAC)

EPA

PA Interactive Chemical Safety for Sustainability (iCSS) D...

EPA has released the first beta version (version 0.5) of the **Interactive Chemical Safety for Sustainability (iCSS) Dashboard**. The beta version of the iCSS Dashboard provides an interactive tool to explore rapid, automated (or in vitro high-throughput) chemical screening data generated by the Toxicity Forecaster (ToxCast) project and the federal Toxicity Testing in the 21st century (Tox21) collaboration.

The iCSS Dashboard contains the results from more than 800 Assay Endpoints (High-Throughput Screening-HTS Data) across over 1,800 chemicals from seven primary HTS assay sources. The release of the iCSS Dashboard coincides with the release of the ToxCast Phase II data. All of the ToxCast Phase II data (including assay summary activity files, assay description files, effect and endpoint data files from animal toxicity studies, concentration response data files & chemical library and structure files) are available on the [ToxCast Data Download Page](#).

Users of the iCSS Dashboard v0.5 can perform basic data and chemical selection, as well as simple data exploration in a seamless environment. EPA will continuously add functionality and improve overall usability and performance. The initial release conveys the conceptual framework and design of the iCSS web application.

Stakeholder Opportunities to Learn & Explore the Data

- [Stakeholder Workshops & Data Summit](#)

Cast Data Use Considerations

- The activity of a chemical in a specific assay does not necessarily mean that it will cause toxicity or an adverse health outcome. There are many factors that determine whether a chemical will cause a specific adverse health outcome. Careful review is required to determine the use of the data in a particular decision context.
- Interpretation of ToxCast data is expected to change over time as both the science and analytical methods improve.

To get the best possible experience using the iCSS Dashboard application we recommend using Mozilla Firefox or Google Chrome.

Please email the [Dashboards Team](#) to provide feedback on ways to improve the Dashboard or to be added to a mailing list to receive status updates. The intent is to use stakeholder feedback to develop updated versions of the iCSS Dashboard and to add more Dashboards.

The vision is for the Dashboard to evolve into an iCSS web application which will become the portal to access all EPA computational toxicology research data and studies including:

- Rapid, automated (or in vitro high-throughput) chemical screening data generated by the EPA's Toxicity Forecaster (ToxCast) project and the federal Toxicity Testing in the 21st century (Tox21) collaboration.

# Impact: Tutorial Video Increased ToxCast Data Usage

## Measuring impact of Video

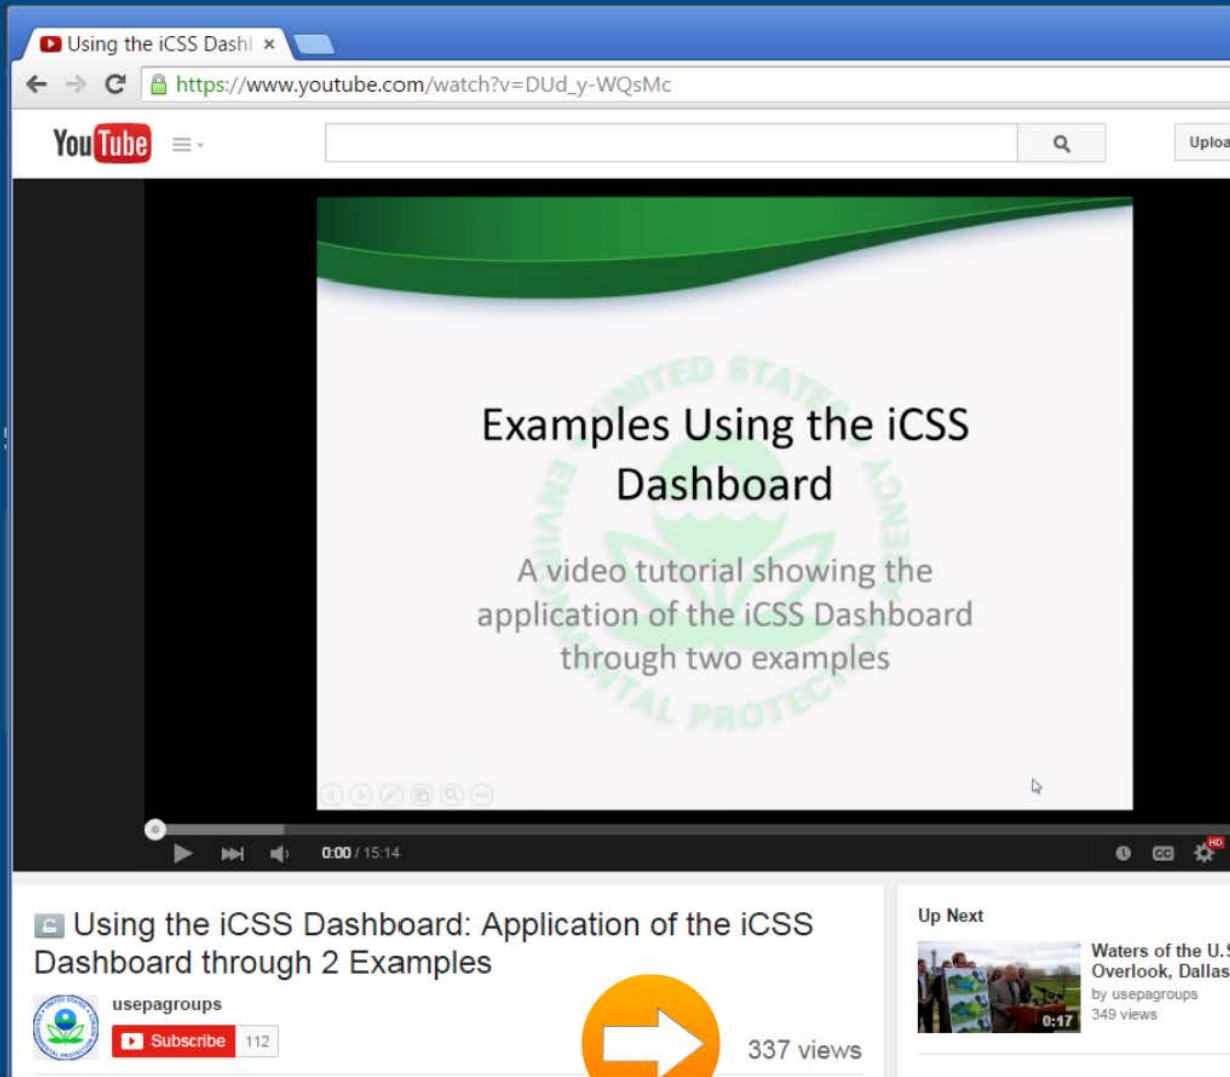

## Further impact of stakeholder feedback

## Number of views as of April 26

The screenshot shows a YouTube video player interface. The browser tab is titled "Using the iCSS Dashl". The address bar shows the URL "https://www.youtube.com/watch?v=DUD\_y-WQsMc". The YouTube logo and search bar are at the top. The video player displays a title slide with the text "Examples Using the iCSS Dashboard" and a subtitle "A video tutorial showing the application of the iCSS Dashboard through two examples". A large, faint circular watermark for the "UNITED STATES ENVIRONMENTAL PROTECTION AGENCY" is visible in the background. The video progress bar shows 0:00 / 15:14. Below the video player, the title "Using the iCSS Dashboard: Application of the iCSS Dashboard through 2 Examples" is displayed, along with the channel name "usepagroups" and a "Subscribe" button with 112 subscribers. A large orange arrow points to the view count "337 views". To the right, the "Up Next" section shows a video titled "Waters of the U.S. Overlook, Dallas" by "usepagroups" with 349 views.

## Peaks in use around stakeholder events and video release

# Impact: Tutorial Video Increased ToxCast Data Usage

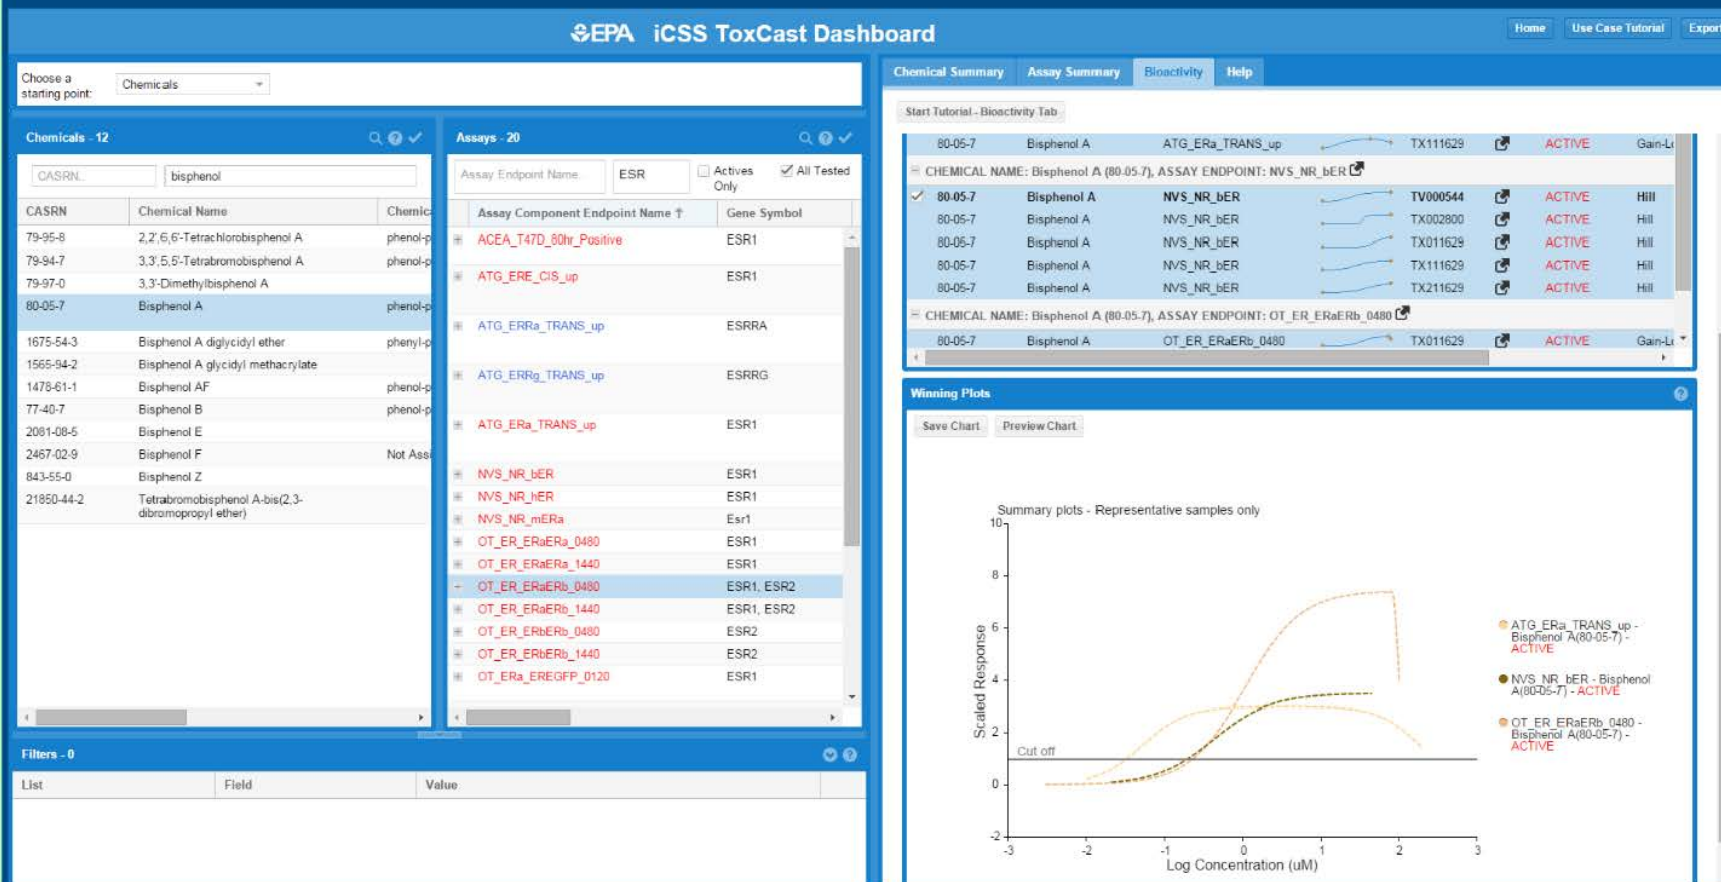

Measuring impact of Video

Further impact of stakeholder feedback

# New Dashboard incorporates stakeholder feedback

# Second tutorial video addresses stakeholder questions on CompTox tools

## EPA's Computational Toxicology Tools

### DSSTox Database

A resource for high quality chemical structures and chemical annotation in association with toxicity data

ToxCast and Tox21 chemical information management and cheminformatics foundation platform

[www.epa.gov/ncct/dsstox](http://www.epa.gov/ncct/dsstox)

### ToxCast Data Download

Download high-throughput data on all ToxCast chemicals, assays, genes, pathways, and endpoints

Data on over 1,800 chemicals and 500 assays

[www.epa.gov/ncct/toxcast/data.html](http://www.epa.gov/ncct/toxcast/data.html)

### CPCat Database

Contains data that maps over 43,000 chemicals to a set of terms categorizing their usage or function

User can search for chemicals by chemical name, CASRN, or CPCat terms (i.e. category names) associated with chemicals

[actor.epa.gov/cpcat](http://actor.epa.gov/cpcat)

### ACToR Database

Warehouse of all publicly available chemical toxicity data

Aggregates data from over 1,000 public sources on over 500,000 environmental chemicals

Searchable by chemical name, structure and other identifiers

[www.actor.epa.gov/actor](http://www.actor.epa.gov/actor)

### iCSS Dashboard

An easy to use interface that facilitates the navigation through millions of in-vitro data points included in the ToxCast data

User can export the subset of data of interest

[actor.epa.gov/dashboard](http://actor.epa.gov/dashboard)

### Exposure Database

Consolidates observational human exposure data

Links to health related data, and also to ACToR data like: toxicity data, environmental fate data, and chemical manufacture information

[actor.epa.gov/actor/faces/ExpoCastDB/Home.jsp](http://actor.epa.gov/actor/faces/ExpoCastDB/Home.jsp)

### EDSP21 Dashboard

Explore data on over 1,800 chemicals that were tested in 11 androgen, 18 estrogen, and 4 thyroid assays

Integrates data from: DSSTox, ACToR, CPCat, ToxCast, and high-throughput exposure information

[actor.epa.gov/edsp21](http://actor.epa.gov/edsp21)

## Future Directions

iCSS Dashboard and Data are constantly evolving

- Improvement of data analysis
- Addition of chemicals/assays

New dashboard to be released this summer

- Addition of functionality
- Built in tutorials, FAQs and Glossary
- Plans for feedback and training
  - Internal and external user testing
  - Demos, webinars, and workshops for training
  - Ideas?

Chemical Summary

Assay Summary

Bioactivity

Help

Glossary

### Commonly used Abbreviations

### Assay & Bioactivity descriptors

- AC50: chemical concentration (in  $\mu\text{M}$ ) where 50% of the maximum response is achieved
- ACEA: assay vendor ACEA
- APR: assay vendor Apredica
- ATG: assay vendor Attagene
- BSK: assay vendor Bioseek
- Burst assay: set of assays used to estimate Cytotox limit per chemical
- CR: concentration-response
- CYP: cytochrome P450 enzymes
- Cytotox limit: estimate of concentration at which significant cytotoxicity occurs
- GPCR: G-protein coupled receptors
- Intended target family: biological grouping of assays (e.g., GPCR, Nuclear Receptor)
- Fold change: factor by which the chemical-mediated response differs from control
- NVS: assay vendor NovaScreen
- OT: assay vendor Odyssey Thera
- Representative sample: the sample chosen from replicates based on majority activity call and the minimum AC50.
- Top of curve (aka. Top): maximum response achieved by the modeled CR curve
- Tox21: assays run as part of the Tox21 collaboration
- Winning plots: Showing only the CR curve for the representative sample

### Chemical descriptors

FAQ

### What is can the iCSS ToxCast Dashboard be used for ?

The ToxCast Dashboard- for targeted users to **facilitate data distribution** and use of chemical screening data from the Toxicity Forecaster (ToxCast) project and the f

- Target user: industry, academia, researchers, state and federal agencies, NGO's, etc
- An interactive tool to facilitate data exploration and visualization
- Functionality to export a subset of the user's data of interest

## Future Directions

Outline of Planned Videos		Release Date
1	iCSS Dashboard: Example Using iCSS Dashboard	Released 9/14
2	Overview of CompTox Tools	Expected Release 6/15
3	Data Download Page: Description of Files and Accessing Data	Expected Release 8/15
4	EDSP21 Dashboard	Expected Release 10/15
5	Detailed ToxCast Assay Data and Information	2016
6	Animal Toxicity Studies File	2016
7	Chemical List and Annotation Files	2016
