Subject: RE: NCEA Interagency Communication #182a (Dioxin: transmission of review materials - part 1 of 4)

Norman,

USDA has completed the review of the dioxin documents titled – *EPA’s Reanalysis of Key Issues Related to Dioxin Toxicity and Response to NAS Comments, Volume 1 (non-cancer)*. At this time, USDA has no comments on the technical approach used for calculating the Reference Dose (RfD).

Please note that the spelling of “dioxin” needs to be corrected in the IRIS summary document.
Thank you.

Katrina
