## **Questions for Evaluating Funding Options**

1. Can this fundraising activity be integrated into program activities that are already planned? Fundraising should be embedded in all of your organization's activities, rather than as a separate part of your organization. Whenever staff members are doing programming, they should always ask themselves how they can incorporate a fundraising component, recruit members, or maintain strong relationships with existing members.  2. Will this strategy result in non-monetary benefits? (e.g. media exposure, new partnerships)?  3. Do we have the resources (upfront money, people, skills, partners, and planning time) to carry it out? Remember to consider implementation and feasibility while developing your strategy. Even the most innovative ideas will fail if not implemented properly.  4. Has this strategy worked well for us or groups like ours in the past?  5. Will our target constituencies respond well to this strategy? Yes No What is the worst thing/best thing that could happen?  6. Can we get everyone (staff members, board members, volunteers, etc.) involved in our fundraising strategy?			
media exposure, new partnerships)?  3. Do we have the resources (upfront money, people, skills, partners, and planning time) to carry it out? Remember to consider implementation and feasibility while developing your strategy. Even the most innovative ideas will fail if not implemented properly.  4.
